## 1 Introduction

Bolton Clinical Commissioning Group (thereafter known as the CCG) are committed to a programme of effective information risk and incident management incorporating data security, protection and confidentiality. Access to confidential information must be in accordance with the General Data Protection Regulation (GDPR) principles and within the jurisdictions permitted for a CCG. Therefore access must have a legal basis as per GDPR and be on a need to know basis, justified when required and monitored. The CCG has a procedure for investigating breaches of data security and confidentiality as documented in the Data Security and Protection and Incident Reporting Procedure.

This procedure applies to all CCG staff who work on behalf of the CCG such as third party contractors and others (e.g. business partners, including other public sector bodies, volunteers, commercial service providers).

This procedure outlines the arrangements adopted by the CCG for the auditing and monitoring of data security, protection and confidentiality issues in relation to the processing of personal data. It provides an assurance mechanism by which the effectiveness of controls implemented within the organisation are audited, areas for improvement and concerns are highlighted together with recommendations to ensure confidentiality is maintained.

## 2 Aims and Objectives

Data security, protection and confidentiality audits will focus on control within electronic records management systems, paper record systems and data security and confidentiality processes undertaken by departments, for example checking transfers of information processes and housekeeping such as screen locking. The purpose is to discover whether data security and / or confidentiality has been breached or put at risk through deliberate misuse of systems as a result of weak, non-existent or poorly applied controls.

Assurance that controls are working should be part of the CCG's overall information risk assurance framework. Failure to ensure that adequate controls to manage and safeguard data security and confidentiality are implemented may and fulfil their intended purpose may result in a breach of that confidentiality. This potentially could contravene the requirements of Caldicott, the General Data Protection Regulation (GDPR), the Data Protection Act 2018, the Computer Misuse Act 1990 and the Human Rights Act 1998.

The following are typical data security and confidentiality alerts which are regularly monitored – please note this list is not exhaustive:

- Monitoring of data security / Information Governance (IG) breaches and recommendations to ensure these are implemented Confidential

(walk around) audits around the sites where Bolton CCG staff are located

- Complaints from members of the public / staff regarding processing of personal data
- Informal alerts made by staff
- Reported near misses

### **3 The General Data Protection Regulation (GDPR) Principles**

Data Security, protection and confidentiality audit processes ensure that the CCG is adhering to the GDPR principles (Article 5) when processing personal data which are as follows:

Personal data shall be:

- 1a) Processed lawfully, fairly and in a transparent manner
- 1b) Collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes
- 1c) Adequate, relevant and limited to what is necessary
- 1d) Accurate and kept up to date
- 1e) Kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed
- 1f) Processed in a manner that ensures appropriate security of the personal data

**And,**

- 2) The controller shall be responsible for and be able to demonstrate compliance with the principles above

The audit processes documented in this procedure provide evidence and assurance that GDPR is being complied with and this can be demonstrated.

### **4 Accountability and Responsibilities**

#### **Responsibility of the Caldicott Guardian**

The Caldicott Guardian has overall responsibility for the monitoring incidents and complaints relating to confidentiality breaches and is responsible for ensuring that access to confidential information is regularly audited within the

CCG. Recommendations and concerns arising from confidentiality audits are actioned within a reasonable timeframe.

### **Responsibility of the Senior Information Risk Owner (SIRO)**

The SIRO is responsible for ensuring that the Confidentiality Audit Procedures are in place in order to mitigate information risk within CCG.

### **Responsibility of the Data Protection Officer (DPO)**

The DPO is responsible for advising on compliance including ensuring confidentially procedures are in place, provision of data security training and awareness and is also the main point of contact with the Information Commissioner.

### **Responsibility of the Information Governance (IG) Team**

The Information Governance Team are responsible for co-ordinating the approach for investigating data security and confidentiality alerts which arise from incidents, complaints, audit reports, informal alerts.

### **Responsibility of Managers / Heads of Service/ Information Asset Owners**

All managers are responsible for ensuring that staff for whom they are responsible for are aware of their responsibilities with regard to data security and confidentiality of information and ensure that staff complete Data Security Awareness training.

Managers are responsible for ensuring that their staff are fully aware of the mechanisms for reporting actual or potential data security / confidentiality breaches within the CCG. This is documented in the Data Security and Protection and Incident Reporting Procedure (IG007) and can be found on the CCG Intranet.

They are also responsible for complying with data security and confidentiality audits and ensuring that subsequent recommendations are complied with within specified timescales.

Access to electronic and / or paper confidential information must be strictly controlled within each managers / information asset owner's area of responsibility. They will be responsible for ensuring that appropriate authorisation is gained prior to allowing access to electronic and / or paper confidential records in order that only those individuals with a legitimate right are given access. This authorisation must be documented and retained for monitoring purposes. This must also be documented in the Information Asset Register and include information as to who has gained access (name, title, department), the reason access required and the level of access permitted.

### **Responsibility of the Information Governance Board**

The Information Governance Board, chaired by the CCG IG Lead and DPO will be responsible for ensuring that the Confidentiality Audit Procedures are implemented throughout the CCG. The procedure will be reviewed and approved by this Board.

### **Responsibility of Employees**

All staff have a duty to read and work within current policies. They should ensure that confidential information is not accessed without prior authorisation and completion of the appropriate documentation. Confidential information should also not be disclosed to unauthorised recipients.

Any breach or refusal to comply with this policy is a disciplinary offence, which may lead to disciplinary action in accordance with the CCG's Disciplinary Policy, up to and including, in appropriate circumstances, dismissal without notice.

All staff must be aware that Data Security / Information Governance audits may occur at any time without prior notice.

## **5 Monitoring and Auditing Access to Confidential Information**

In order to provide assurance that access to confidential information is gained only by those individuals that have a legitimate right of access, it is necessary to ensure appropriate monitoring is undertaken on a regular basis.

Monitoring should be carried out by the Information Asset Owner or delegated to the Information Asset Administrator for an electronic system in order to check irregularities regarding access to confidential information can be identified. If irregularities are found these should be reported to the Data Protection Officer / Caldicott Guardian / CCG IG Lead and the IG Team following the CCG's incident reporting processes and action taken by the Information Asset Owner / Administrator to rectify the situation, either through disciplinary action, the implementation of additional controls or other remedial action as necessary.

Actual or potential breaches of confidentiality should be reported **immediately** to the IG Team and logged as an incident following CCG's IG reporting processes in order that the incident can be reviewed and remedial action taken to mitigate further breaches. Further information regarding this can be found in the Data Security and Protection and Incident Reporting Procedure (IG007).

The IG Team are responsible for ensuring that the Data Protection Officer / CCG IG Lead / Caldicott Guardian and / or SIRO are informed of any

concerns highlighted as a result of monitoring compliance with data security and confidentiality processes.

If any member of staff fails to adhere to data security and confidentiality processes this will be dealt with in accordance the CCG's Disciplinary Policy.

Confidentiality audits will be conducted by the IG team in conjunction with IG Staff Surveys on an annual basis, and will cover the following areas:

- Audit and observations of any data security, confidentiality or information security breaches
- Security applied to manual files e.g. storage in locked cabinets / locked rooms
- The use of and disposal arrangements for post-it notes, notebooks and other temporary or paper recording material
- Retention and disposal arrangement – confidential waste procedures / archiving procedures
- The location of post trays for incoming and outgoing mail – are they located in secure areas
- Staff comprehension regarding their responsibilities pertaining to data security and confidentiality and the rights regarding access to confidential information
- Checks to ensure staff have read, understood and signed the Confidentiality Code of Conduct / have an employment contract with relevant GDPR clauses contained within it
- Checks to test staff awareness regarding who to contact regarding Subject Access requests, Freedom of Information requests and how to report data security / IG incidents
- Observations of good practice regarding assuring the data security and confidentiality of personal data and business sensitive data.

### Methodology

Confidentiality audit checks are undertaken using a variety of methods such as unannounced spot checks and walk round site audits conducted by the DPO, SIRO and IG Team and also using the methods as listed in Appendix A. The results of the walkabout audits and formal audits are discussed at the IG Board and any non-compliance will be followed up.

Areas of non compliance will be reported on the Non-Compliance Observation Sheet (Appendix B) and fed back to Line Managers/Information Asset Owners for action and follow up. Areas of good practice will also be identified and provide details of compliance with confidentiality requirements.

Where non-compliance and / or information risks are observed, this will be reported back to the relevant line manager and include recommendations for action and a target date for completion. A named individual (such as Line Manager / Information Asset Owner) will be responsible for ensuring that the

recommendation is implemented. Further checks will be made to ensure the recommendation has been implemented and risks mitigated.

Reports will also be produced detailing the outcome and any information risks identified. These will be presented to the IG Board and when required to the DPO / CCG IG Lead / Caldicott Guardian and / or SIRO.

Other methods of audit checks include follow up from complaints, alerts and incidents reported which may involve producing audit reports from an electronic system to check, for example, if a member of staff has inappropriately accessed a record.

Information Asset Owners / Line Managers must ensure that the use of the system / asset is monitored and check for any inappropriate activity such as failed login attempts or breaches of confidentiality.

The IG Team undertake an annual staff survey to test comprehension using questions derived from the Data Security & Protection Toolkit (DSPT). This assists to highlight areas of good practice and identify areas where further training / guidance / support is required.

#### Logging and Reporting of confidentiality alerts/incidents

The CCG's Data Security and Protection and Incident Reporting Procedure (IG007) applies when any data security breach or IG incident needs to be reported. This is logged on the CCG Data Security Breaches / Information Governance Incident Reporting Logbook. The DPO and the IG Team will investigate and ensure they are reported to the ICO if required, via the Data Security and Protection Toolkit (DSPT).

Incident / data breach outcome reports will be submitted to the IG Board and to the DPO / CCG IG Lead / Caldicott Guardian and SIRO. Exceptional issues will be escalated to the Caldicott Guardian and DPO for advice. Lessons learned will be disseminated through appropriate communication processes.

## **6 Training and Awareness**

This procedure will be available on the CCG Intranet. Staff are also informed about the reporting of breaches / alerts / incidents via the CCG induction process. Lessons learned from incidents will be fed back into future training or where appropriate to the staff concerned to encourage further participation and demonstrate the value of reporting to CCG staff.

The DPO / CCG IG Lead / Caldicott Guardian and SIRO are made aware of information governance related incidents / complaints / alerts reported and the associated action plans to mitigate similar incidents occurring in the future.

All staff will continue to be informed about the importance of reporting data security / information governance related incidents via a variety of communication methods such as staff bulletins, policies, procedures, specific training etc.

## **7 Monitoring and Review**

This policy will be reviewed on a every two years, and in accordance with the following on an as and when required basis:

- legislative changes; good practice guidance; case law;
- significant incidents reported; new vulnerabilities; and
- changes to organisational infrastructure.

## **8 Legislation and related documents**

A set of procedural document manuals will be available via the CCG's website..
